**DETAILED ACTION**

1. Information Disclosure Statement filed on 4/14/04 has been received.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 7-17 and 21-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagai (U. S. Patent no. 6,296,237).

See figures First flexible member 38, second compressible member 12, ring 14.

Regarding claims 7-9, see column 3 lines 60-61.

Regarding claims 13-15 and 25-27, see column 7 lines 35-40

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 5,6,18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagai.

Art Unit: 3683

Nagai is relied upon as above. Nagai does not disclose the specific materials claimed.

Nagai does disclose the use of urethane. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use microcellular and thermoplastic urethane in the device of device of Nagai as both are well known materials and their selection is merely a design choice based on factors like cost, durability, spring rate, ease of assembly, and environment of use.
